

## OBJECTIVE

---

Dedicated and detail-oriented Senior Software Developer with a strong background in web development, particularly in Java, Spring Boot, HTML, CSS, and Angular. Proven track record of delivering high-quality web applications by integrating rigorous quality assurance practices. Seeking to leverage technical expertise and passion for software excellence to drive innovative and efficient web solutions, while continuously expanding knowledge in emerging web technologies.

## EDUCATION

---

**Lafayette, LA**                      **South Louisiana Community College**                      **Sept 2016 – May 2018**

- Technical degree specializing in application software development.
- Coursework: HTML 5; JavaScript; CSS; Java EE; Database Design; SQL; C#; Networking; Data structures

## EMPLOYMENT

---

**Lafayette, LA**                      **Perficient**                      **Feb 2018 – Feb 2024**

- Collaborate with clients to decipher intricate business needs and bring them to life through innovative full stack solutions. By leveraging cutting-edge technologies, I aim to create engaging user experiences that align with clients' objectives and exceed expectations.
- Facilitate our Java Center of Excellence, spearheading innovation and expertise while crafting comprehensive training materials for Java and Spring Boot mastery.

## TECHNICAL EXPERIENCE

---

- Directed the technical design and development of several cutting-edge websites, utilizing Angular, JavaScript, TypeScript, Bootstrap, and CSS to craft dynamic, multiplatform user interfaces. Also worked on developing intricate integration with backend APIs and third-party services, demanding meticulous adherence to security and data privacy standards.
- Developed robust Spring Boot REST services within a microservices architecture, prioritizing scalability, flexibility, and resilience while also collaborating with cross-functional teams to integrate automated testing into the CI/CD pipeline to facilitate faster release cycles.
- Conducted comprehensive code reviews and maintained documentation for automated test cases and best practices, leading to a more robust and maintainable test suite.
- Proficient in production support, adept at conducting application and log monitoring, swiftly triaging high-priority incidents, and providing invaluable support to developers during the debugging process to ensure seamless application functionality and minimize downtime.
